## DLS Courseware Guide

### 1. Introduction

Welcome to the Distributed Learning System (DLS) Courseware Guide. This document serves as a starting point for those who need to locate available courseware. The search for Distributed Learning (DL) courseware will be a one-stop connection when the Army's Learning Management Systems (LMS) is fully fielded and operational. Until the Army LMS is fully operational, DLS suggests those in search of DL content and courseware begin by using the resources outlined in this guide.

There are a variety of types of courses offered through DLS in Digital Training Facilities (DTFs). Some courses deliver collective training (for a unit or group of individuals), while most of the current content is geared toward individual training. These courses may come in the form of Video Tele-Training (VTT)<sup>1</sup>, Computer Based Training (CBT), or the Internet.

DLS has identified two types of sources to locate courseware:

- **General Sources** - best used for general searches of Army courseware databases. Good for conducting initial searches of a variety of courses.
- **Proponent Schools and Other Sources** – best used for Military Occupational Specialty (MOS) or branch courseware searches that may not be supported via the general sources.

It is best to begin your courseware search with **General Sources** and then move to the **Proponent Schools and Other Sources**. In either case, you should know as much about the kind of training desired as possible (MOS, branch, specific skills, VTT, CBT, etc.).

These sources are good for general awareness of available courseware, but often do not guarantee the level of automated training material sophistication. Some content is interactive and captures attention, while other content is simply displayed on web pages or in Microsoft (MS) Word documents. Consult with other DTFMs or the proponent school (if contact information is available) to receive more information about the content delivery style.

---

<sup>1</sup> Although VTT courses are delivered on a specific schedule, many courses are still available on videotape. To locate taped copies of these courses, contact the respective proponent school or DTFM leadership (many DTFMs tape the courses for their library).

## 2. General Sources

### 2.1 Distributed Learning System Website: <http://www.dls.army.mil/>

The DLS website provides detailed information about the Distributed Learning System (DLS), Digital Training Facilities (DTF) and the Army Learning Management System (LMS). The DLS website also provides an extensive listing and hyperlinks to the Army's key training repositories for Distributed Learning (DL) courseware and self-development materials.

**Note:** The DL Approved Courseware List should not be confused with courses that are available for use in DTFs. Typically, the instructor or student is responsible for locating the courseware in this listing.

Other training links within the DLS website:

- **Approved Courseware List:** [http://www.dls.army.mil/pdf/DLS\\_Courseware.pdf](http://www.dls.army.mil/pdf/DLS_Courseware.pdf)
- **Army e-Learning Program:** <http://usarmy.skillport.com/>

**Note:** Army e - Learning Program offers more than 1,500 Information Technology, Business Skills, and Interpersonal Skills courses. The e-learning link will provide information on passwords, registration, and catalog help if needed.

### 2.2 Army Training Requirements and Resources System (ATRRS) Course Catalog: <https://www.atrrs.army.mil/default.asp>

ATRRS is the Army's official automation system that maintains information on training requirements, determines training programs, manages class schedules, allocates class quotas, makes seat reservations, and records student attendance.

ATRRS can help you find courseware through its course catalog. The course catalog contains information about specific courses including:

- Course title
- School hosting the course
- Whether it supports Distributed Learning or not
- Class dates (if applicable)
- Course prerequisites
- Course descriptions
- Other useful information

#### How to use the ATRRS course catalog search tool

**STEP 1:** To find courses listed in ATRRS go to <https://www.atrrs.army.mil/> and locate the "Course Catalog" box in the upper right hand corner of the page and select the click "Here" link. This link will send you to the following address: <http://www.atrrs.army.mil/atrrscc/>

This page has a catalog search tool that returns various course listings.

**STEP 2:** Enter information to narrow the course search. The best way to view course listings is by selecting one or more of the following items in the drop down menus:

- Officer AOC (Area of Concentration)
- Enlisted MOS (Military Occupational Specialty)
- Enlisted ASI (Additional Skill Identifier)
- Enlisted SQI (Skill Qualification Identifier)
- Warrant ASI (Additional Skill Identifier)
- Warrant SQI (Skill Qualification Identifier)

The search tool requires that you enter a number-letter combination. The various options are available in the drop down menu. Descriptions that correspond with various number-letter combinations have been provided in an Excel Workbook, which accompanies this document (see the "MOS and Special Skills Lists" Excel file), but are also available by clicking on the field name.

The other selections can be helpful, but are not necessary unless you are looking for a special course (i.e. languages, courses only offered by certain schools, etc.). Lists of the selections are available by clicking on the field name.

**STEP 3:** Click on the "**Search the ATRRS Course Catalog**" link.

After the link is selected the search tool will return a list of courses that corresponds to the information requested.

**STEP 4:** Select the course via the Course Number.

Click on the course number to display specific details of the course and corresponding dates that it is offered.

## **2.3 Reimer Digital Library (RDL):** <http://www.adtdl.army.mil/>

The Reimer Digital Library is the Army's key repository for all types of training materials. Currently there are over 700 Online Correspondence Courses in the Reimer Digital Library. The following is the recommended method to search for **Correspondence Courses** in the RDL:

1. Access the Reimer Digital Library with the following address:  
<http://www.adtdl.army.mil/>
2. Locate and select the "**Reimer Digital Library – Search for Products**" link in the upper left hand corner. The next web page provides the capability to search for **Official Departmental Publications** (Training Manuals) or **Commandant Approved Training** from the proponent school.
3. To search for correspondence courses select "Commandant Approved Training." Under "Type", select "Correspondence Courses". Under "School", select the proponent school and select "Submit." This will provide all the Correspondence Courses developed by that school.

## **2.4 The Army Distributed Learning Program (TADLP) – Training and Doctrine Command (TRADOC):** <http://www.tadlp.monroe.army.mil/>

TRADOC is responsible for coordinating the development of distributed learning courseware. The TADLP website provides a listing of MOS related courses that are identified by a TRADOC numbering system, proponent branch and course name.

The following links provide the TADLP Report that identifies a by year listing of courses scheduled for development as well as the FY '04 Master Redesign list.

- **TADLP Report:** <http://www.atsc.army.mil/ITSD/TADLPReport9-22-04.asp>
- **Master Priority Course Listing:** <http://www.tadlp.monroe.army.mil/FY03MASTER>

## **2.5 Army Training Support Center (ATSC) – Individual Training Support Directorate (ITSD):** <http://www.atsc.army.mil/itsd/index.asp>

This site serves as an entry point for ATSC's Online Catalog, Products and TRADOC's Courseware Status Report.

- **Online Catalog:** <http://www.adtdl.army.mil/atdls.htm> - Identifies a list of over 700 online courses that are stored in the Reimer Digital Library. To locate specific courses use the same search method as discussed in paragraph 2.3.
- **Products:** <http://www.atsc.army.mil/itsd/products.asp> - Provides Army Correspondence Course Program (ACCP), Common Core Training, Common Task Test (CTT), On-Line Catalog of Education / Training Products, Staff and Faculty Training Courseware, and Training Media Support.
- **TADLP Courseware Status Report:** <http://www.atsc.army.mil/itsd/reportintro.asp> - Provides the list of DL courses in development and fielded for use today. Additionally, the report identifies if the courseware can be used in DTFs.

## **2.6 Army National Guard Distributed Learning:** <http://www.dttp.ngb.army.mil/>

The Army National Guard Distributed Learning Program is known as the Distributive Training Technology Project (DTP). The online courses and descriptions for the **Army National Guard** and **Professional Education Center** are listed below:

- **Army National Guard Online Courses:** [http://www.arng.army.mil/about\\_us/training/dl/dl\\_courses.asp](http://www.arng.army.mil/about_us/training/dl/dl_courses.asp)
- **National Guard Professional Education Center (NGPEC):** <http://mil.ngpec.org/>

### 3. Proponent Schools and Other Sources
